

ENERGY SAVINGS PERFORMANCE CONTRACTING

Energy Savings Performance Contracting (ESPC) is a state contract program managed by the Department of Mines, Minerals & Energy and the Department of General Services. It is available to all state agencies and is approved for use by all public bodies in the Commonwealth. The ESPC program allows agencies and public bodies to use a streamlined procurement process by selecting from a list of pre-qualified contractors

DID YOU KNOW?

DMME provides support to all state agencies and public bodies interested in learning more and/or pursuing an ESPC opportunity

- DMME support is free of charge
- DMME staff work with interested parties throughout the entire process from start to finish, as well as post-project monitoring and validation
- Savings are guaranteed for the life of the project by the contractor

What Is Energy Savings Performance Contracting?

Energy Savings Performance Contracting (ESPC), or performance contracting, is a budget-neutral approach to implementing facility improvement projects without using funds from capital budgets. Guaranteed cost savings from energy- and water-saving projects meet finance payments over the useful life of the equipment. ESPC also can be an effective near-budget-neutral approach to leverage capital budgets or other funding sources.

If you face these problems at your facility, ESPC may be an ideal solution:

- ✓ Old or inefficient equipment
- ✓ Too many demands on your budget
- ✓ Deferred and/or recurring maintenance problems
- ✓ Limited available staff time
- ✓ Operations or compliance issues
